

INVICTUS TECHNOLOGIES

“Beyond Dimensions”

YOUR ENGINEERING PARTNER

INVICTUS TECHNOLOGIES

"Beyond Dimensions"

About Us

Invictus Technologies is a pioneering engineering services company dedicated to delivering innovative solutions from concept design to prototyping. With a commitment to excellence and a focus on customer satisfaction, we leverage cutting-edge technologies and industry expertise to address complex challenges across various sectors.

"Lets take a Quantum Leap"

Viksit Bharat @ 2047

What We Value

Innovation: We embrace creativity and innovation to develop groundbreaking solutions that meet evolving industry needs.

Quality: We uphold the highest standards of quality in every aspect of our work, ensuring reliability, performance, and customer satisfaction.

Collaboration: We believe in collaborative partnerships, both internally and externally, to leverage diverse perspectives and achieve collective success.

Integrity: We conduct business with integrity, honesty, and transparency, building trust and credibility with our clients and stakeholders.

Our logo embodies our philosophy of first principle thinking, depicted as a cross-section of a cube which represents our commitment to foundational principles and innovative solutions.

Furthermore, the logo is a shadow of a fourth-dimensional object, showcasing our dedication to pushing boundaries and exploring new dimensions to deliver exceptional results.

Mission

To deliver unparalleled engineering solutions that drive innovation, efficiency, and sustainable progress. We are dedicated to surpass client expectations by providing cutting-edge technologies, fostering a culture of collaboration and continuous learning, and maintaining an unwavering commitment to excellence

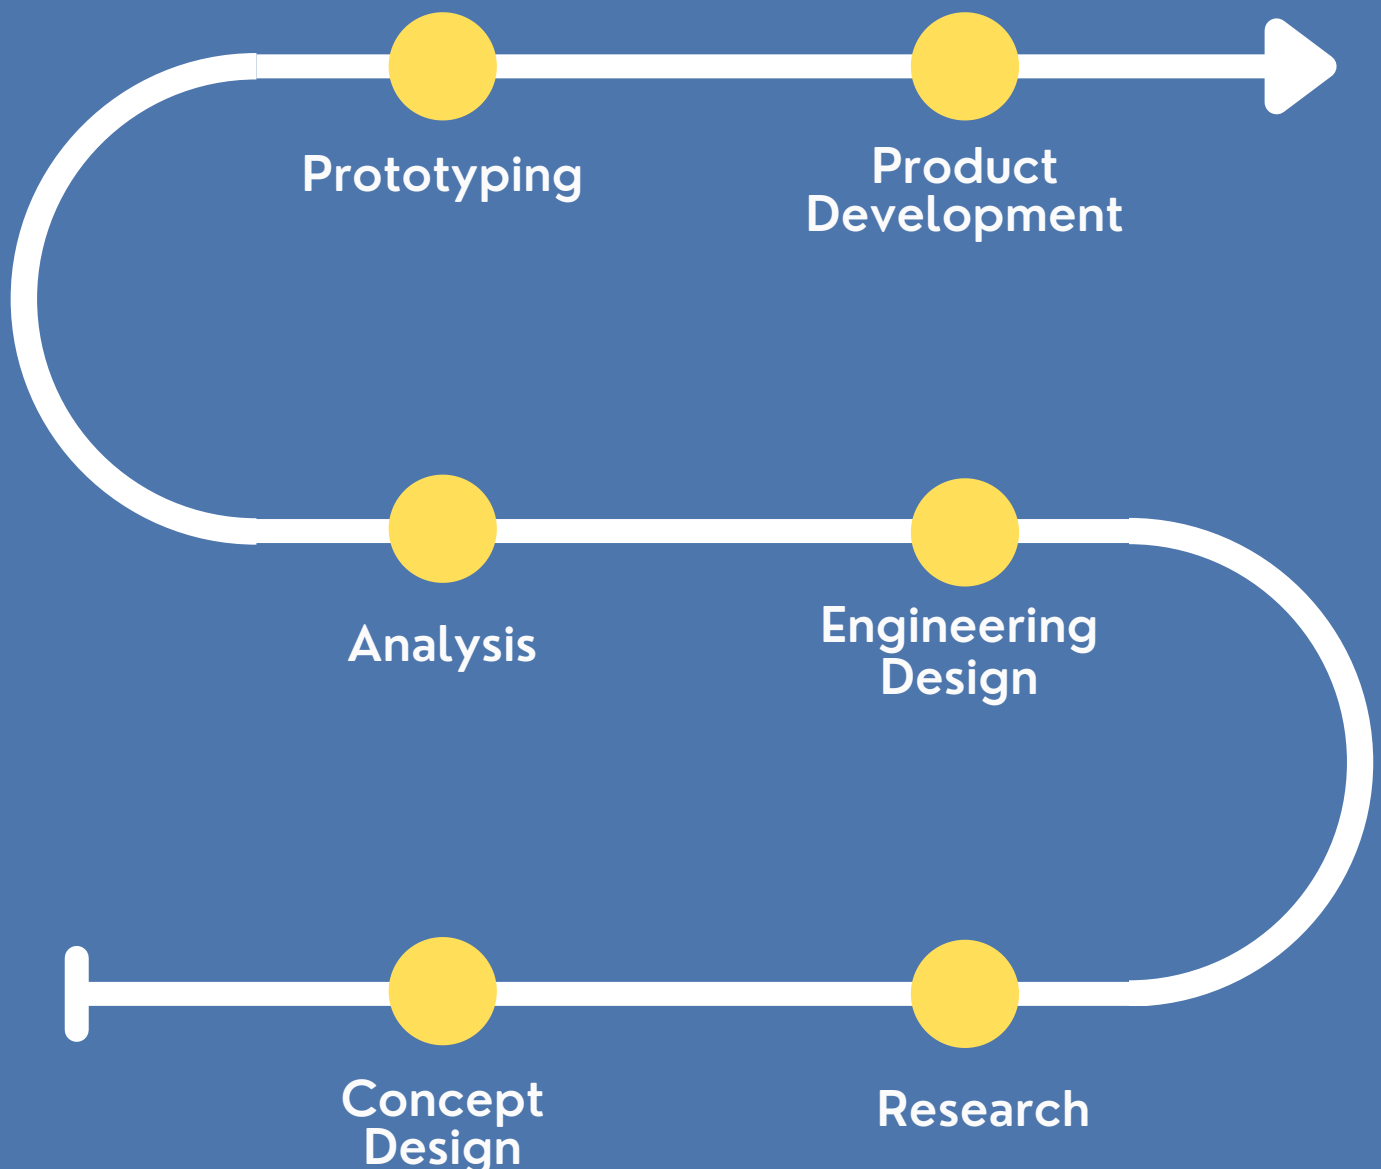

Services Offered

End-to-end Engineering Services

 Special Purpose Machines

 Automation

Services Offered

- Detailed Design
- Reverse Engineering
- Material Selection & Testing
- Product Design & Development
- Value Engineering
- Modeling
- 2D detailing
- Assemblies
- CAD Conversions
- Prototyping & Testing
- Structural Design
- Mechanical Design

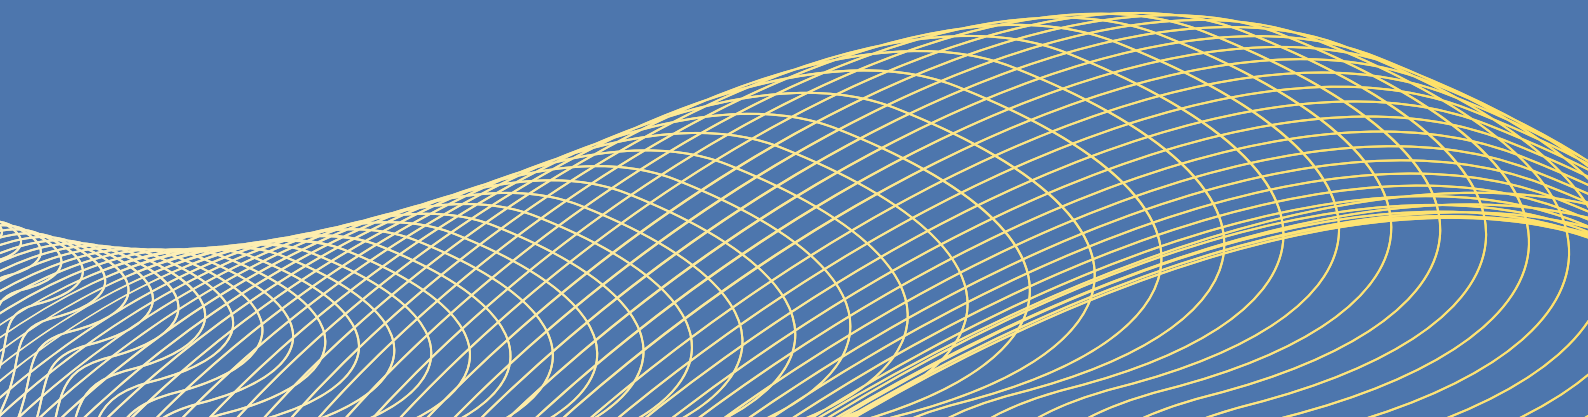

- Meshing
- Structural Analysis
- Linear & Non-Linear Analysis
- Static & Dynamic Stress Analysis
- Static & Dynamic Strength Analysis
- Fatigue & Buckling Analysis
- Modal & NVH Analysis
- Thermal Analysis
- CFD Analysis

Benefits

- 1 **New Product Development**
- 2 **Faster Time to Market**
- 3 **Cost Efficient**
- 4 **Expertise and Support from Subject Matter Experts**
- 5 **Customization & Flexibility**
- 6 **Innovation & Adaptability**
- 7 **Long-term Partnership**
- 8 **Streamlined Processes**
